

# ASBESTO STRIP INNOVATIONS UK LTD

*“The World Leader in Safe Asbestos Removal Technology”*

## **WHY USE THE SAFESTRIP SYSTEM OVER ANY OTHER INJECTION SYSTEM FOR THE REMOVAL OF ASBESTOS?**

### **PERFORMANCE**

- 1200 simultaneous injection points possible
- Extremely low fibre release, if any, during use with Astrip Concentrate
- Greater production rates from workforce during A.C.M. removal
- System will run day or night without supervision
- Quicker clean up time
- The wetting fluid Astrip Concentrate is acknowledged to be the most effective available in the world

### **USABILITY**

- Very easy to use
- Ergonomically designed to meet operating needs
- Colour coded tubing for easy length selection
- Quick release couplings used throughout

### **MAINTAINABILITY**

- Minimal maintenance required
- Needle valve assemblies do not require flushing after use with Astrip Concentrate
- Unit situated outside the enclosure therefore does not get contaminated

### **FEATURES**

- Robust and self contained
- No electricity required - one connection to the water supply
- 100m of inlet and supply hose
- Automatic Astrip Concentrate/water dilution system
- High quality product
- Full selection of accessories available to run off the system

### **BACK-UP**

- Training & advisory service following purchase with 6 months warranty

### **VALUE FOR MONEY**

- Proven over 12 years of on-site projects
